

Dr. Alexa Grudzinski is a cardiac anesthesiologist and structural echocardiographer at the University of Ottawa Heart Institute and an Assistant Professor at the University of Ottawa. She completed her anesthesiology residency training at the University of Ottawa and earned an MPH in Clinical Effectiveness from Harvard University concurrently with her residency. She subsequently completed fellowship training in cardiac anesthesiology at the University of Ottawa Heart Institute, with a clinical focus on structural and interventional echocardiography. She is a member of the Heart Institute's Structural Heart Team, with clinical and academic interests in perioperative TEE quality improvement and advanced intraprocedural imaging.
